Electric Rate Revenue Requirement Proposal

Village of Little Valley, New York · Prepared for the Board of Trustees · October 20, 2026

EISNERAMPER

$29,000
FIXED FEE

One fixed fee covers the electric rate study, up to 10 hours of Public Service Commission (PSC) filing support, and one onsite visit for the Board presentation. We can deliver findings in time for your February 2027 budget process.

Your Situation

LAST RATE INCREASE
2013
Electric rates are unchanged since.

SUBSTATION AND UPGRADES
$9 million
Current estimated capital need.

RATE APPROVAL
PSC
Required for any rate change.

The Village wants to know how to increase its electric rates so it can build a $9 million substation.

About EisnerAmper

EisnerAmper is a professional services firm. Our utility rates practice works with municipalities and utility districts, and we have an office in New York City. Our rate study work has centered on municipal water and sewer systems, where we take an accounting-first approach: rates are built from the entity's actual financial records, capital plan, and reserve needs, and are written so a governing board can explain them to ratepayers. The lead on this engagement spent nine years at a large electric utility with about $13.7 billion in annual revenue and $60.9 billion in assets.

Scope of Work

This work determines the revenue the electric system needs to build a new substation and supports the PSC filing of the new rate. Village staff would supply the information needed, and we would work with them throughout.

Task	What we do
Data review and financial analysis	Review electric fund financials, current rate schedules, customer and sales data, and power supply costs, including the NYPA allotment and supplemental purchases above it. Pass-through power costs are treated separately from base rates.
Capital funding plan	Model funding options for the substation and related upgrades, including debt, reserves, and any available grants, and show the effect on debt service and the system's financial targets.
Revenue requirement and rate recommendation	Project multi-year revenue needs, calculate the new rates required to achieve that revenue, recommend a phasing schedule, and show the estimated impact on a typical customer bill.
PSC filing support	Prepare the financial schedules and supporting documentation, help the Village prepare the required customer notices, and support responses to PSC Staff questions. Legal documents remain with Village counsel. The fixed fee includes up to 10 hours of this support.
Board presentation	Deliver a written report and present findings to the Village Board of Trustees.

Fee Estimate

$29,000

Fixed fee for the electric rate study, which includes up to 10 hours of PSC filing support and one onsite visit for the Board presentation.

Assumptions

- Village staff provide requested data within two weeks of kickoff.
- The fee includes one Board presentation (onsite) and up to 10 hours of PSC filing support.
- Timing of PSC review is controlled by the Commission, and we cannot estimate how long the filing process will take. Additional filing support is billed at a blended rate of $250 per hour. Specific rates are available on request.
- Kickoff and data discussions are held virtually. Additional onsite visits are billed at the same blended rate for our time, with travel time billed at one-half of the hours traveled, plus travel costs at cost, with prior approval.
- The scope is a revenue requirement, financial plan, and new rates to achieve that revenue, applied to the Village's existing rate structure. A cost-of-service study and rate redesign are not included.
- We understand the Village may treat this engagement as professional services under Section 6 of its procurement policy, and we will follow the Village's process.
- This estimate is valid for 30 days.

Timeline and Next Steps

The Village needs its numbers by February 2027 for the budget process, and we can meet that date. We expect to deliver findings roughly six to eight weeks after we receive the Village's data, and to start the PSC filing support once the Board accepts the recommendation. If the Board is comfortable with this approach, we can begin with a kickoff call with Village staff and a data request list.

> **Note on Additional Services**
> If the Village later wants a cost-of-service study or a review of its rate design, meaning how costs are allocated among customer classes and whether the rate structure should change, we would scope and price that work separately once the revenue findings are in hand.

We appreciate the opportunity to be considered and would welcome questions from the Board.

Louis, I received a reply from parts this morning. The PTO is leaking and we will need to replace as we do not rebuild in the field. See below and if you approve we will get parts ordered.

PTO: part #65386190TU= $2,532.56, in stock

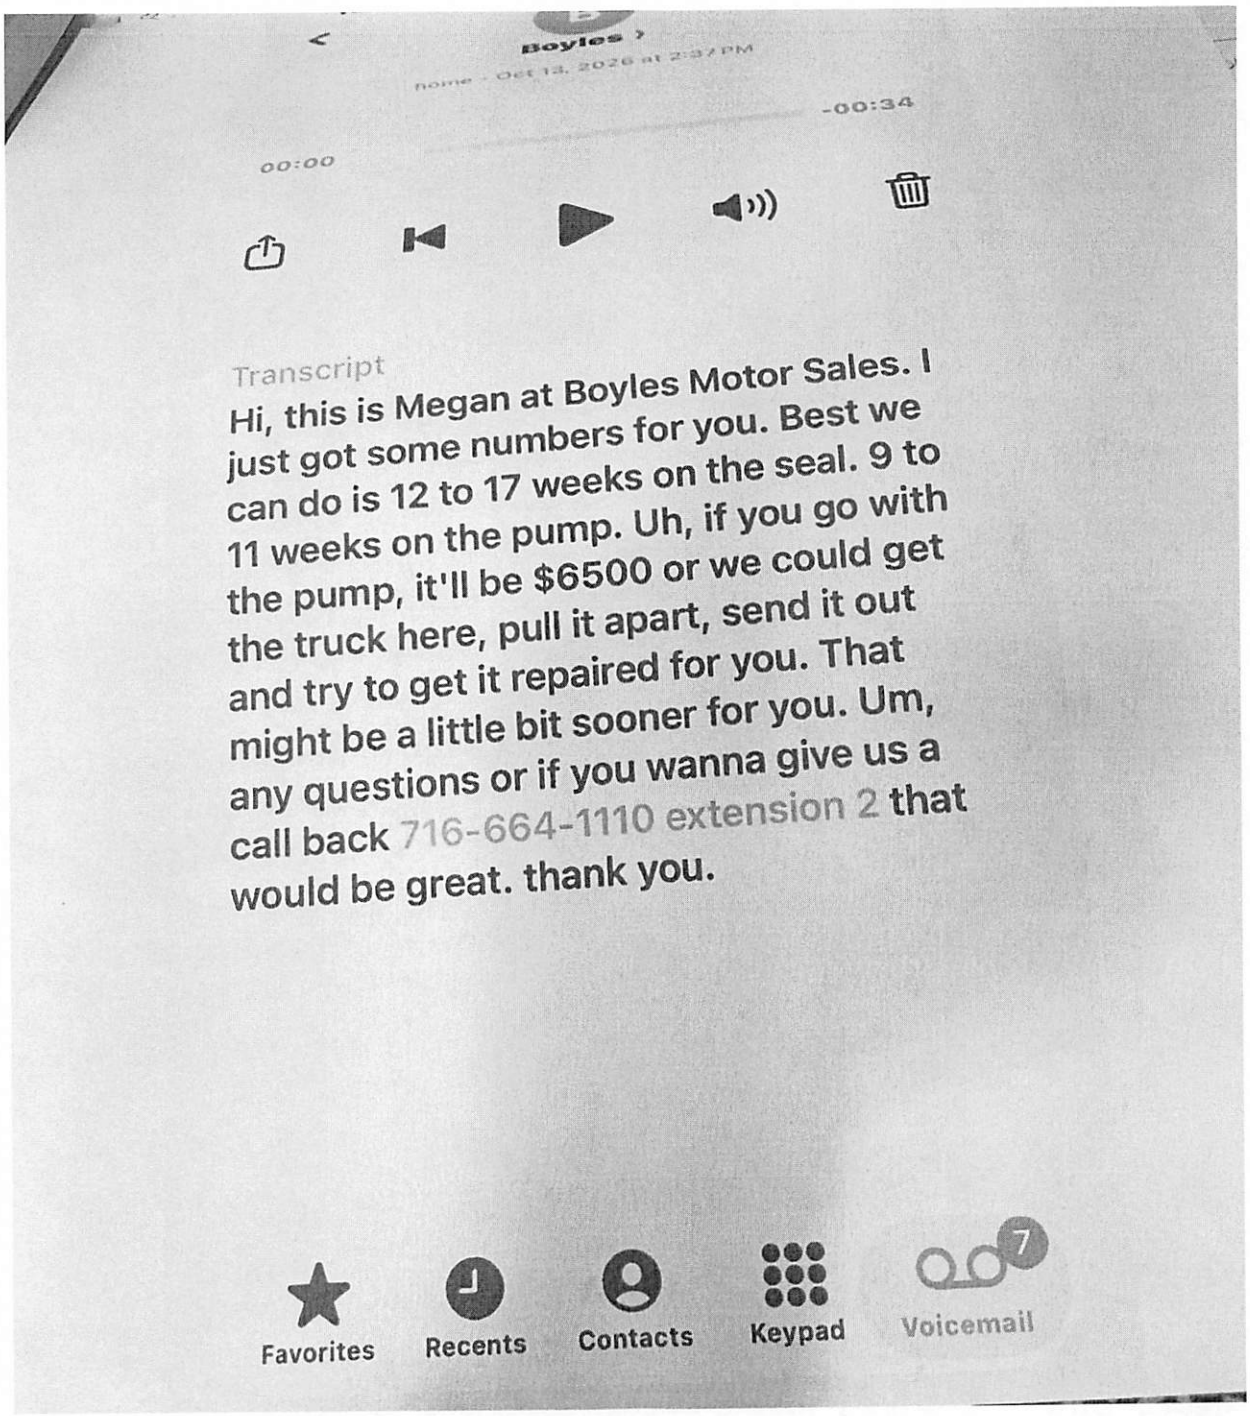

O-ring: part #15704TU= $1.12, in stock

Respectfully,

Ted Sulik

Hi, this is Megan at Boyles Motor Sales. I just got some numbers for you. Best we can do is 12 to 17 weeks on the seal. 9 to 11 weeks on the pump. Uh, if you go with the pump, it'll be $6500 or we could get the truck here, pull it apart, send it out and try to get it repaired for you. That might be a little bit sooner for you. Um, any questions or if you wanna give us a call back 716-664-1110 extension 2 that would be great. thank you.
