Road Condition & Vehicle Compliance Report

Date of Report	September 23, 2026
Report #	59
Project Name	Alle-Catt Wind
Location	Town of Freedom
Date of Inspection	September 23, 2026
Time of Inspection	9:00 am
Weather and Temperature (Degrees)	Sun, 63° (F)
Observer Name	Thomas Miller
Purpose of Visit	To observe and report the conditions of the Town of Freedom jurisdictional roads and infrastructure while in use by the Alle-Catt Wind Project.
Summary of Observations	- Traveled each Town road known to be used by the project and noted deficiencies observed (see following report pages). - Active roadwork was observed during this visit. - No vehicles seen in violation of the Road Use Agreement when traveling these routes. - See following pages for issues identified on Town roads.

Road / Section Name:	North Road
Initial QES Assessment:	Satisfactory
Road Surface Condition:	Not Satisfactory
Hazards Identified:	- North Road is showing deterioration along the East edge of the road - North Road East edge and shoulder near 11509 - North Road is showing lane and edge deterioration South of 11875 - North Road is showing lane deterioration near Bray Road
Maintenance Needed:	- Apply QPR to significant potholes - Repair shoulders

East edge of North Road

East edge of North Road

East edge of North Road

North Road East edge and shoulder near 11509

North Road East edge near 11582

North Road North edge and shoulder deterioration near 11614

North Road lane and edge deteriorating with South of 11875

North Road lane, edge, and shoulder deterioration near 11980

Lane deterioration North Rd near intersection with Bray Rd (REPAIRS IN PROGRESS)

Road / Section Name:	Eagle Street
Initial QES Assessment:	Satisfactory
Road Surface Condition:	Not Satisfactory
Hazards Identified:	- Eagle Street is showing signs of deterioration along the West edge of road near intersection with Hughes Road - Eagle Street is showing deterioration along the West edge of the road from 849 to 873 - Eagle Street is showing deterioration along the East side of the road near Bray
Maintenance Needed:	- Repair lanes and shoulders.

Eagle Street lane and edge deterioration near 1253

Eagle Street East and West side lane and edge deterioration near 1244

Eagle Street North and South side lane and edge deterioration near 1219

Eagle Street South side lane and edge deterioration near 11405

Eagle Street lane and edge deterioration near 1152

Eagle Street lane and shoulder deterioration near 1111

Eagle Street East edge deterioration near Hughes

Eagle Street lane and East edge deterioration near 994

Eagle Street lane deterioration near 1000

Eagle Street lane and edge deterioration near 931

Eagle Street lane deterioration near 915

Eagle Street lane deterioration South of 849

Eagle Street East edge and shoulder deterioration near 757

Eagle Street lane and edge deterioration North of 757

Eagle Street East lane deterioration near 708

Road / Section Name:	Hughes Road
Initial QES Assessment:	Satisfactory
Road Surface Condition:	Not Satisfactory
Hazards Identified:	- Hughes Road shoulder deterioration on North and South sides East of 951
Maintenance Needed:	- Repair shoulder

Hughes Road edge and shoulder deterioration on North and South sides East of 951

Road / Section Name:	Bray Road
Initial QES Assessment:	Satisfactory
Road Surface Condition:	Not satisfactory
Hazards Identified:	- Edge/shoulder deterioration showing along various locations. - Road edge deterioration progressing into road at intersection of Bray and Eagle.
Maintenance Needed:	- Repairs should be made for lane and shoulder deterioration.

Bray Road North edge and shoulder deteriorating from gas pipeline #57 to +/- House 113

Bray Road North edge and shoulder deteriorating from +/-113 to +/-2473

Bray Road South edge and shoulder West of 113

Bray Road North edge and shoulder deteriorating with Pothole near 2407

Bray Road North edge deteriorating near 223

Bray Road South edge and shoulder deteriorating near 223

Bray Road North edge and shoulder deteriorating near 245

Bray Road South edge and shoulder deteriorating near 259

Bray Road North and South edge and shoulder deteriorating near 2317

Bray Road North edge and shoulder deteriorating near 2231

Bray Road South edge and shoulder deteriorating near 409

Bray Road North edge and shoulder deteriorating from 409 to 475

Bray Road North edge and shoulder deteriorating from 475 to Eagle Street

Bray Road South edge and shoulder deteriorating from 475 to Eagle Street

Bray Road Edge Deterioration at Eagle Street Intersection

Bray Road lane deterioration near intersection with Eagle St

Bray Road North edge and shoulder deteriorating from Eagle Street to +/- 2801

Bray Road South edge and shoulder deteriorating from Eagle Street to +/- 2801

Bray Road North edge and lane deterioration near 2801 (#1)

Bray Road lane deterioration near 2801 (#2)

Road / Section Name:	Brown Schoolhouse Road
Initial QES Assessment:	Satisfactory
Road Surface Condition:	Not satisfactory
Hazards Identified:	- Shoulder deteriorating on East and West edge of road - Lane deterioration near Route 98 intersection
Maintenance Needed:	- Repair shoulders - Repair intersection

Brown Schoolhouse Road lane deterioration near intersection with Route 98

Brown Schoolhouse Road West shoulder near 11770

Brown Schoolhouse Road East edge and shoulder deterioration from 11754 to 11740

Brown Schoolhouse Road East shoulder deterioration South of 11748

Brown Schoolhouse Road West shoulder North of 11448

Brown Schoolhouse Road East shoulder North of 11448

Brown Schoolhouse Road West shoulder deterioration from 11354 to 11258

Brown Schoolhouse Road West shoulder deterioration from 11214 to 11123

Road / Section Name:	Fisher Blake Road
Initial QES Assessment:	Satisfactory
Road Surface Condition:	Not satisfactory
Hazards Identified:	- North edge of road deteriorating near 2195 to +/- 2272 - North edge of road deteriorating near 2177 - North edge of road deteriorating near intersection with Brown Schoolhouse Rd
Maintenance Needed:	- Repair shoulders

Fisher Blake Road North edge and shoulder deterioration near intersection with Brown Schoolhouse Road

Fisher Blake Road edge and shoulder deterioration near 2177

Fisher Blake Road North edge and shoulder deterioration near 2195

Fisher Blake Road North edge and shoulder deterioration from 2195 to +/- 2272

Road / Section Name:	Edmunds Road – **Invenergy/Logisticus to confirm whether project is using this road**
Initial QES Assessment:	Good
Road Surface Condition:	Not satisfactory
Hazards Identified:	- Potholing and lane deterioration forming at intersection with Brown Schoolhouse Rd. This item will be removed from report if confirmed that project does not use this road, see this page for photo. - Edge of road deteriorating near 1812
Maintenance Needed:	- Repair intersection - Repair shoulder

Edmunds Road intersection of Brown School House

Edmunds Road South edge and shoulder deterioration 1940 to 1850

Edmunds Rd Southeast edge and shoulder deteriorating near 1812

Edmunds Rd lane and shoulder deterioration on North and South sides of Rd near intersection with Maple Grove

Road / Section Name:	Strong Road – Currently not in RUA but being used by project
Initial QES Assessment:	Poor
Road Surface Condition:	Poor
Hazards Identified:	- Multiple potholes in paved sections of road
Maintenance Needed:	- Apply QPR to significant potholes
Non-Hazard Items for Continued Observation:	- Unpaved sections have been filled with gravel.

Strong Road potholes

Strong Rd potholes

Strong Road pothole

Road / Section Name:	Galen Hill Road
Initial QES Assessment:	Satisfactory
Road Surface Condition:	Not satisfactory
Hazards Identified:	- Galen Hill Rd and 98 intersection pothole - Lane deterioration from Phillippi Rd to 10553 Gallen Hill
Maintenance Needed:	- Large pothole and deterioration at Galen Hill Rd and 98 intersection, repairs needed. - Repair lane from Phillippi Rd to 10553 Galen Hill
Non-Hazard Items for Continued Observation:	- Minor deterioration throughout lanes of travel to be monitored, see this page.

Galen Hill Road intersection with Phillippi Rd lane deterioration

Galen Hill Road lane deterioration from Phillippi Rd to 10553

Galen Hill Rd pothole at intersection of Route 98

Galen Hill West edge and shoulder deterioration North of 10075

Road / Section Name:	Sandbank Road
Initial QES Assessment:	Fair
Road Surface Condition:	Not satisfactory
Hazards Identified:	- Road surface deterioration near 10317
Maintenance Needed:	- Discuss repair with Highway Supervisor
Non-Hazard Items for Continued Observation:	- Road edge deterioration, Road surface deterioration

Sandbank Road East edge and shoulder deterioration near 9999

Sandbank Rd East and West edge deterioration North and South of 10157 to +/- 10220

Sandbank Road East and West edge / shoulder deterioration near 10238

Sandbank Rd West lane and edge deterioration South of 10317

Sandbank Rd East lane and edge deterioration South of 10317

Sandbank Rd lane deterioration near 10317

Sandbank Road East edge deterioration South of 10368

Sandbank Rd East and West side shoulder deterioration near 10442

Sandbank Road (East and West) edge and shoulder deteriorating near intersection with Cross Road

Road / Section Name:	Osmun Road
Initial QES Assessment:	Satisfactory
Road Surface Condition:	Not satisfactory
Hazards Identified:	- Curvert/road washout condition near 10379 Osmun Rd. (Repair in progress)
Maintenance Needed:	- Repair shoulder - Maintain diversion ditch and install additional erosion control measures near 10379 Osmun
Non-Hazard Items for Continued Observation:	- Monitor repairs made to road edges

Osmun Rd Edge and shoulder deterioration near Zimmer (REPAIRED)

Osmun Rd lane deterioration near Zimmer (REPAIRED)

Osmun Road lane deterioration South of 10200 (REPAIRED)

Osmun Road East lane and shoulder deterioration near 10200 (REPAIRED)

Osmun Rd lane deterioration North of 10220 near construction entrance (REPAIRED)

Osmun Rd: Road over Culvert near 10379 facing North (REPAIRS IN PROGRESS)

Osmun Rd East side lane, edge, and shoulder deterioration North and South of 10410

Osmun Road East edge and shoulder deterioration near 10571 (REPAIRED)

Osmun Rd edge deterioration South of 10674 (REPAIRED)

Osmun Road lane deterioration near 10674

Road / Section Name:	Baird Road
Initial QES Assessment:	Satisfactory
Road Surface Condition:	Not satisfactory
Hazards Identified:	- Deterioration of shoulder South edge from +/- 379 to +/- 253
Maintenance Needed:	- Repair shoulder

Baird Rd South shoulder deterioration East and West of 379 (REPAIRED)

Baird Rd North shoulder deterioration East and West of 379 (REPAIRED)

Baird Road South edge deterioration from +/- 379 to +/- 253

Baird Road North edge deterioration from +/- 379 to +/- 253 (REPAIRED)

Baird Road lane deterioration from 253 to 187

Road / Section Name:	Jones Road – Currently not in RUA but being used by project
Initial QES Assessment:	Fair
Road Surface Condition:	- Not satisfactory
Hazards Identified:	N/A
Maintenance Needed:	- Repair this spring.
Non-Hazard Items for Continued Observation:	- Jones Rd. should be paved from Route 98 to the bridge, see this page for photo.

Jones Rd
